Linear Features
Hedges and other linear features can offer a higher biodiversity value per length than a standard area of habitat due to factors such as connectivity and must therefore be compensated for in parallel to the standard metric.

Biodiversity Impact Assessment Summary

Site name:	Anderson Avenue	
Planning reference number:		

Habitats	Area (ha)	Habitat Biodiversity Value
Total existing area onsite	11.96	23.77
Habitats negatively impacted by development Habitat Impact Score	9.36	17.54
On site habitat mitigation Habitat Mitigation Score	9.36	12.29
Habitat Biodiversity Impact Score		-5.25
If -ve further compensation required		29.95
Percentage of biodiversity impact		
Linear features	Length (km)	Linear Biodiversity Value
Total existing length onsite	1.23	7.02
Linear features negatively impacted by development Linear Impact Score	0.00	0.00
On site linear mitigation Linear Mitigation Score	0.00	0.00
Linear Biodiversity Impact Score		0.00
If -ve further compensation required		
Percentage of linear biodiversity impact		

For any questions with regard to biodiversity impact and this development please contact Warwickshire County Council Ecological Services:

email: planningecology@warwickshire.gov.uk
tel: 01926 418060

If there is an anticipated loss to biodiversity and no further ecological enhancements can be incorporated within the development it may be possible to compensate for this loss through a biodiversity offsetting scheme.

Please contact The Environment Bank for discussions on potential receptor sites in your area:

email: Imartland@environmentbank.com
tel: 01926 412772

Trading Down Correction

	High	Medium-High	Medium	Medium-Low
Value of existing habitat loss per distinctiveness	0.00	0.00	0.00	0.00
Value of created habitats per distinctiveness	0.31	0.00	1.39	0.00
Would this result in trading down habitats?	Never	No	No	No
If no, value each distinctiveness still requiring compensation	0	0	0	0
Surplus gain to be carried over to compensate loss of lower habitats (rolls over)	0.31	0.31	1.70	1.70
Trading down correction value	n/a	0	0	0

This calculator assess whether there is any down trading in habitats value. E.g. loss of high distinctiveness habitat cannot be compensated for by surplus medium mitigation. It correction value which enters into the primary calculator to take this into account. Such that the full level of high habitat loss compensation is required. However if additional me generated above the value of the high loss, this surplus is still be taken into account with on site gain.

CAUTION - Destruction of habitats of high distinctiveness, e.g. lowland meadow or ancient woodland, may be against local policy. Has the mitigation hierarchy been followed, can impact to these habitats be avoided?

Any unavoidable loss of habitats of high distinctiveness must be replaced like-for like.

If no, value each distinctiveness still requiring compensation	0	0	0	0	0.00
Surplus gain to be carried over to compensate loss of lower habitats (rolls over)	0	0	0	0	n/a
Trading down correction value	n/a	0	0	0	0

This calculator assess whether there is any down trading in linear habitats. E.g. loss of high distinctiveness habitat and surplus creation of medium or low habitats. It calculates a correction value which enters into the primary calculator to take this into account. Such that the full level of high habitat loss compensation is required. However if additional medium gain is generated above the value of the high loss, this surplus is still be taken into account with on site gain.

CAUTION - Destruction of each habitat of medium distinctiveness and above should be mitigated for with creation/restoration of a similar habitat. Trading up of habitat type is encouraged.
